# AMERICA'S MOST PRECISE RATION CONTROL GRAIN FEEDERS

As the cost of farm operations increases, it's more important than ever to get the most out of your pasture, reduce feed waste and costs, while still achieving your livestock production targets. Our feeders offer precise ration control to make this a reality by lowering your costs and increasing your production.

Most pasture can be complemented with a supplement to improve rumen function and leads to increased livestock production with less feed consumption. The feed quantity in most applications is minimal, making ration control crucial to cost effectively achieving the benefits of improved rumen function

Our unique 3-Way Restriction System enables this control and gives our customers the best opportunity to maximize results and cost saving across all seasons.

ORDER

0

Traditional feeders rely on the animal becoming tired of licking and do not limit them from feeding. The Advantage Feeders 3-Way Restriction System is unique; it offers the most precise control over the height, depth and width of the feed access area.

When our 3-Way Restriction System is set in a restricted position, the animal's tongue can only touch a few grains or pellets with each lick. This significantly reduces wasted feed or excess consumption from unlimited access to the trough.

After approximately five minutes of licking, the animal's tongue becomes dry, and it can no longer feed. Depending on the paddock environment, livestock come to the feeder 5-10 times per day, creating a system of supplementation in little and often amounts.

From small farm operations to large ranches, Advantage Feeders support farmers across the USA to save on operation costs and increase production outcomes.

# HOW ADVANTAGE FEEDERS HELPS FARMERS ACHIEVE MORE

#### 25% added feed conversion:

- Reduce feed waste and control the ration without expensive limiters
- · Purchase feed in bulk and refill less frequently
- Streamline the feeding process to reduce labor costs

#### **Enhanced Livestock Production:**

- Upper Adjuster Handles and Lower Adjuster Cams enable easy adjustments and precise feeding control
- Enhance rumen function and minimize the need for additional supplementation
- Utilize the feeders year-round to optimize pasture conversion and forage utilization

#### Finally, a feeder that lasts:

- Stainless steel troughs and adjusters offer resistance to rust and ensure longevity
- · Hot-dip galvanized skids and G90 galvanized sheetmetal provide durability and corrosion resistance
- A cleaning tool is included to maintain cleanliness

#### **Customer Satisfaction and Support:**

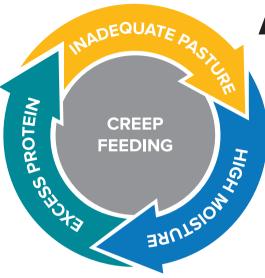

- · Online tools and video tutorials are available for customer convenience
- 30-day money back guarantee allows customers to try the product with confidence
- 2-year standard warranty provides assurance and support

#### Minimize the effect from wild pigs:

- Advantage Feeders 3-Way Restriction System significantly limits wild pigs from consuming feed in the trough area
- Wild pigs struggle to access feed due to their inability to use their tongues effectively
- Wild pigs lose interest quickly and leave the feeder after a short time
- Reduces economic losses caused by wild pigs

# ADVANTAGE FEEDERS FULL YEAR PASTURE CONVERSION SYSTEM

#### **GET THE BEST RESULTS FROM YOUR FEEDERS**

THE RATION CONTROL OF OUR 3-WAY RESTRICTION SYSTEM ALLOWS YOU TO MAXIMIZE YOUR PASTURE, FODDER, AND SUPPLEMENT CONVERSION ALL YEAR.

**INADEQUATE PASTURE:** With the lifecycle of pasture, at times it will have inadequate energy and/or protein to meet your production goals. Advantage Feeders 3-Way Restriction System gives you the tools to achieve production goals with labor and waste saving benefits while supporting the rumen to be more efficient in converting imperfect, but cost effective, pasture.

**HIGH MOISTURE PASTURE:** When rain commences at the start of a growing season, pasture is often high in moisture and passes through stock too quickly to be fully absorbed. Advantage Feeders' innovative hay feeders and 3-Way Restriction System give you the tools to increase stocking rates at this time so you can capitalize on the high quantity of quality pasture when it becomes abundant.

**EXCESS PROTEIN PASTURE:** During the growing phase of pasture, before flowering, the soluble protein level is often much higher than required. In this period, the animal wastes a substantial amount of energy excreting excess protein in its urine. This energy could alternatively be utilized for production. Advantage Feeders' 3-Way Restriction System gives you the means to eliminate this issue and to maximize your production.

**CREEP FEEDING:** Creep feeding is a system that transforms the rumen of infant stock from non-functional to effective far quicker than consuming a diet of pasture alone. Compared to traditional systems where a cow or ewe consumes pasture to produce milk to feed the young animal, creep feeding short circuits the production system and quadruples pasture conversion.

The Ranch is close enough to the coast that everything rusts. Advantage Feeders are made from Galvanized Steel with Stainless Steel troughs and are weather tight. During Hurricane Harvey, they had to shovel out thousands of pounds of feed from other feeders, but Advantage Feeders kept the feed dry inside, and they only had to remove the feed from the trough.

#### satility

It works as a creep feeder for calves just as well as it does supplementing bred cows in a drought. They aim for 1-2% of body weight per day, but it's all adjustable. It works with all feed types, from whole corn to their meal feed with cottonseed and DDGS.

#### Less Aggression at the Feeder

Calves don't fight at the feeder. There isn't an urgency to be the first because they learn there is a time limit for those in front.

Calves don't fall off when weaning because they've learned to use the feeder.

#### No Limiter Needed

We mix all of their feed on the farm, and the limiter eats away at feeders and the feed wagon, mixing equipment and augers. Advantage Feeders limit feed intake without the use of a caustic limiter.

Robert Martin Cattle Co, Texas **NEW GRAIN FEEDERS DESIGN** 

STRONG HANDLE

The leverage of the 5mm pressed handle allows the Upper Adjuster to be moved in small and accurate increments

#### **GAUGE SYSTEM**

Each position is numbered for easy communication and setting

#### **LOCKING NUT**

The nyloc nut locking system makes it fast to reposition the Upper Adjuster

#### **LOCKING BOLT**

The locking bolt system makes it fast to reposition the Lower Adjuster

#### **GAUGE SYSTEM**

Each position is numbered for easy communication and setting

#### 13MM EXTRUSION

Provides a leverage point for easy repositioning of the Lower Adjuster

#### UNIQUE PRODUCT ID NUMBER

The number makes it easier to communicate with our sales team

#### LARGE SIGHT GLASSES AT BOTH ENDS

Check the approximate feed volume from a distance

#### UPGRADED ROOF PIVOT

#### (NEW DESIGN)\*

Reinforced to provide additional strength

#### **ADJUSTER GUARD HOUSING AND LATCH (NEW DESIGN)\***

When not in use, the Adjuster Guard is housed in a secure location

#### **REINFORCED STEPS**

Welded flanges and pressed flange for grip and strength

#### **UPPER ADJUSTER HANDLES**

Adjustments to the Upper Adjusters are made from the end of the feeder

#### CREEP FEEDING NUMBERS

#### (NEW DESIGN)\*

Each position is numbered for easy communication and setting

#### SIDE WALL GUTTERS

#### (NEW DESIGN)\*

Enlarged gutters prevent moisture running into the trough

#### ADJUSTABLE STANDS

#### (NEW DESIGN)

Sprung pin system allows for simple and robust adjustment and securing of stand height

#### STAINLESS STEEL FEED AREA

Stainless steel troughs and adjusters ensure the product endures corrosive feeds

#### LOWER ADJUSTER CAMS

Rotating the cams makes adjusting to the Lower Adjusters easy and

#### **ADJUSTMENT TOOL** (NEW DESIGN)\*

Stored in a visible, accessible. and secure location

#### **DROP LOCK PIN ROOF LATCH**

Reliable, simple and strong latching system

#### STRONG RAIN **GUARD BRACING**

Rain protection bracing increases the weather protection strength

#### **VOLUME STICKER**

Obtain an accurate measure of the volume of feed in the hopper

#### **HOUSED CLEANING TOOL (NEW DESIGN)\***

FEEDERS

Stored in a visible, accessible, and secure location

#### SIX ADJUSTER BRACES

Highly accurate and stock proof feed access area

#### **ADJUSTER LOCK**

#### (NEW DESIGN)\*

Lock the adjuster guard in position and prevent food lodging

#### **DEEP TROUGHS**

110mm deep troughs prevent waste and are strong enough for front end loader use

#### **ADJUSTER GUARDS**

#### (NEW DESIGN)\*

Adjuster Guards stop livestock from bulldozing feed out

#### FLOW ASSIST (NEW FEATURE)\*

Minimize lodging of feed on the **Adjuster Braces**

**TO ORDER** 

# **HD GRAIN FEEDERS**

OUR 3-WAY RESTRICTION SYSTEM MAXIMIZES YOUR PASTURE. FODDER AND SUPPLEMENT FEED CONVERSION ALL YEAR ROUND.

#### **8000HD Grain Feeder**

**1270lbs** 

#### **FEATURES**

- Built for Cattle ONLY!
- Reinforced rain protection area
- Easy to use pivoting roof
- Fixed height for cattle
- Mineral Attachment add-on available
- Stainless steel troughs

#### **5300HD Grain Feeder**

5300

Dimensions at cattle height: 8'0"x5'6"x7'9"

Feeds 200-250 goats/sheep, 40-50 cattle/calves

**9**30lbs

#### **FEATURES**

- Reinforced rain protection area
- Easy to use pivoting roof
- Mineral Attachment add-on available
- Stainless steel troughs

#### 2500HD Grain Feeder

#### **+ + +**

Dimensions at cattle height: 8'0"x5'6"x 5'4"

Feeds 200-250 goats/sheep, 40-50 cattle/calves

**750lbs** 

#### **FEATURES**

- Reinforced rain protection area
- Easy to use pivoting roof
- Mineral Attachment add-on available
- Stainless steel troughs

#### 1200HD Grain Feeder

## **+ + +**

Dimensions at cattle height: 4'0"x 5'6"x 5'4"

Feeds 100-125 goats/sheep, 20-25 cattle/calves

**420lbs** 

#### **FEATURES**

- Reinforced rain protection area
- Easy to use pivoting roof
- Mineral Attachment add-on available
- Stainless steel troughs

#### 200HD Grain Feeder

Dimensions: 2'8"x 1'7"x 2'8"

Feeds 25-30 goats/sheep, 6-10 cattle/calves

**7**0lbs

#### **FEATURES**

- Comes with brackets for hanging
- Hangs on gates, fences or steel posts
- Chest handles make it easy to move
- Easy to use pivoting roof
- Stainless steel troughs

# **MOBILE GRAIN FEEDERS**

ALL THE BENEFITS AND QUALITY OF OUR STATIONARY GRAIN FEEDERS WITH THE ADDED CONVENIENCE OF ON-FARM TOWING.

#### **M8000HD Grain Feeder**

Dimensions at cattle height: 12'0"x 7'7"x 8'6"

**1500lbs** 

- **Built for Cattle ONLY!**
- Load sharing tandem axle suspension
- Hangs on gates, fences or steel posts Chest handles make it easy to move
- Easy to use pivoting roof

Stainless steel troughs

#### **M5300HD Grain Feeder**

#### **+ + +**

Dimensions at cattle height: 12'0"x 5'6"x 8'1"

**1240lbs** 

#### **FEATURES**

- Load sharing tandem axle suspension
- 4 Stands for securing when in use
- Stainless steel troughs

#### **M2500HD Grain Feeder**

Dimensions at cattle height: 12'0"x 5'6"x 5'8"

**1100lbs** 

#### **FEATURES**

- Adjustable height hitch to suit any vehicle
- Cattle and goats/sheep can eat over the light truck tires
- Stainless steel troughs

#### M1400HD Grain Feeder

#### **+ + +**

Dimensions at cattle height: 11'4"x 4'3"x 4'4"

Feeds 150 goats/sheep or 40-50 cattle/calves

640lbs

#### **FEATURES**

- Flotation tires operate in wet conditions
- Standard rear pull to tow multiple units
- Stainless steel troughs

# CALL TO ORDER 1-800-806-0715

# RETHINK CREEP FEEDING WITH CONTROLLED INTAKE SUPPLEMENTATION

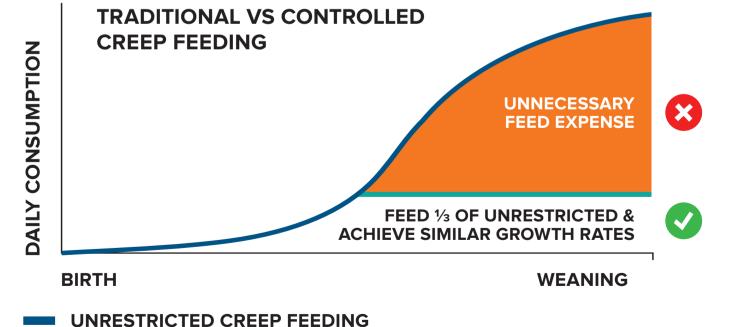

ADVANTAGE FEEDERS 3-WAY RESTRICTION SYSTEMS GIVE YOU THE ABILITY TO MAXIMIZE FEED INTAKE WHEN OFFSPRING ARE YOUNG TO DEVELOP THEIR RUMEN AND THEN, ONCE DEVELOPED, CONTROL INTAKE TO MAXIMIZE GROWTH RATES WITH MINIMAL FEED UNTIL WEANING.

1. FED MILK ONLY

2. FED MILK AND HAY

3. FED MILK AND GRAIN

UNRESTRICTED AND THEN CONTROLLED CREEP FEEDING

#### START CREEP FEEDING WITH NEWBORN ANIMALS

Calves, lambs, and kids start their lives with sterile and undeveloped rumens that cannot digest pasture and other feed types. The sooner that they have access to concentrated feeds with good levels of starch, the sooner their rumen transforms to be an efficient system to digest feeds, importantly pasture.

#### **CONTROLLED CREEP FEEDING MAXIMIZES PROFIT**

When creep feeding starts from birth, it is common for calves to have effectively functioning rumens at 8-12 weeks of age and lambs and kids at 5-6 weeks of age. At this time, traditional (unrestricted) creep feeding can increase rapidly which can increase costs quickly. From this time onwards, controlled creep feeding enables farmers to control the intake to complement the available pasture and maximize profit. Frequently, calves are controlled to 2lb/day and lambs and kids to ½lb/day.

## AVOID FLESHY WEANERS AND MAXIMIZE WEANER VALUE

A common issue with traditional creep feeding is that calves become 'fleshy' or overly fat. These weaners receive a discount and further reduce the potential for it to return profit. Controlled creep fed calves have most of their diet in pasture, are well grown without the issue of excess fat.

## EFFECTIVE BACKGROUNDING AND SEAMLESS WEANING

Controlled creep feeding is a labor efficient and cost-effective way to background calves. It also provides a stress free and seamless way to wean as the calves are less reliant on their mothers and know how to feed on both pasture and concentrates through the feeder.

#### **REDUCE PRESSURE ON MATERNAL ANIMALS**

First time mothers are the hardest to get back in calf in a timely manner. Droughts can also reduce cow condition score and fertility. Controlled creep feeding provides a cost effective way to reduce pressure on vulnerable animals, increase fertility, and maximize profit.

#### LABOR EFFICIENT

Controlled creep feeding only requires approximately 30% of feed that calves consume when traditional creep feeding. This means that you only need to fill feeders 30% as often, and the 8000HD feeder with 8000lb can supply feed to 50 calves at 2/lb/day for 80 days.

#### **CONTINUED FRESH FEED**

The functioning of Advantage Feeders 3-Way Restriction System means that the trough is empty because the feed sits in the feed access area. This means that there isn't any feed in the trough that calves sort through, becomes stale, needs cleaning out, and is wasted.

#### **EASY TO IMPLEMENT**

Advantage Feeders Creep Feeding Gates are the strongest, most durable, and easiest on the market to use. With the use of the Advantage Feeders Lift Assist Bands, moving the 200lb Creep Gates from the active position to the transport can be done in less than a minute. They are hot dipped galvanized and have easy to use latches to lock them in active and transport positions.

# **CREEP FEEDING**

CREEP GATES & PANELS ARE EASILY ADJUSTED TO PROVIDE FLEXIBILITY AS YOUR LAMBS & GOATS GROW, WHILE SAFELY EXCLUDING EWES.

#### **Creep Panels**

- Latches prevent the stock moving creep panels
- Large outer flange to increase strength
- Push button provides quick and easy repositioning
- Compatible models: 5300HD, 2500HD, M5300HD, M2500HD, M1400HD

#### **Creep Gate Narrow**

#### **FEATURES**

- Folding gates for easy transport and set-up
- Locking system in transport & creep feeding
- Adjustable height horizontal bar 9 positions
- Compatible models: 2500HD

#### **Creep Gate Large**

#### **FEATURES**

- Folding gates for easy transport and set-up
- Locking system in transport & creep feeding
- Adjustable height horizontal bar 9 positions
- Compatible models: 8000HD, 5300HD, 2500HD, M8000HD, M5300HD, M2500HD

#### **Creep Gate Lift Assist**

4

LIFT ASSIST BANDS

LIFT ASSIST BOLTS

Taking half the weight, the new Creep Gate Lift Assist Bands makes repositioning an easy one

weaned and fit in with the calves from the mature cow herd."

**Bo Rooks** 

Floral City, Florida

# **HAY FEEDERS**

OUR INNOVATIVE FEEDERS MINIMIZE YOUR WASTE BETTER THAN ANY OTHER PRODUCT SO YOU MAXIMIZE YOUR HAY SAVINGS

#### **Tray Hay Feeder**

- One 4'x6' round
- Assembled dimensions: 7'3"x 6'8"x 5'2"
- Feeds 150 goats/sheep or 40-50 cattle/calves
- 450lbs

Stainless steel flooi

#### **Cradle Hay Feeder**

- One 4'x 6' round
- Assembled dimensions: 4'6"x 6'2"x 3'0"
- Feeds 150 goats/sheep or 40-50 cattle/calves
- **250lbs**

Stainless steel floor

Only Suitable for minature cattle

### Sliding Gates Hay Feeder

- One 8'x4'x4' square bale One 4'x5' round bale Two 4'x4' rounds bale
- Assembled dimensions: 9'0"x 4'8"x 5'9"
- Feeds 150 goats/sheep or 40-50 cattle/calves
- **520lbs**

Adjustable bar widths. Lift hooks for easy transpo

#### **Hay Feeder Roof**

- One 4'x6' round
- Assembled dimensions: 6'6"x 4'9"x 2'9"
- Feeds 150 goats/sheep or 40-50 cattle/calves
- **a** 90lbs

Optional add on

# **ACCESSORIES**

OUR ACCESSORIES PROVIDE YOU WITH THE "WHOLE PRODUCT" SYSTEM TO MAKE ADVANTAGE FEEDERS WORK ON ALL OPERATIONS.

#### Tray Hay Feeder Bull Kit

#### **FEATURES**

Bull Kits for the Tray Hay Feeder and Tray Hay Feeder Extended reduce bar gaps, safeguarding bulls by adjusting widths from 11.8" to 5.5", minimizing head entrapment risks.

#### **Standard Cam Kit**

#### **FEATURES**

- Adjuster Cams rotate to accurately position the Lower Adjuster
- Now standard on all feeders. Retrofit to HD models or the superseded NGF models

#### Sliding Gates Hay Feeder Bar Kit

#### **FFATURES**

The bar kit is designed to reduce the bar width for small animals to 0'3". Internal length is 8'4" for over-length bales.

## Damaged a part?

Have an older feeder that needs a part replaced? Wanting to upgrade a feature? No problem!

Our USA based team can arrange replacement parts for every model of feeder we have ever made, including cleaning tools and adjustment tools.
